PROJECT ENGINEERED SOLUTIONS

Grade 1 listed buildings, shopping centres, fire damaged structures or just ordinary weather protection, no matter what you need to cover, **HAKI** can solve your problems with innovative Project Engineered Solutions. **HAKI's** engineering department will work closely with the client to ensure that the specific requirements of the project are achieved. The unique design of the **HAKITEC® 750** System enables both planned and unplanned access through the temporary roof and can be achieved at any position.

The **HAKI** back-up ensures you get the best from your investment.

- Tailor-made training courses at our dedicated Training Centre
- On-site training by skilled instructors
- Project-engineered solutions
- Estimating software
- Access to technical and practical advice
- Highly experienced and dedicated staff will provide guidance on specification and installation
